

| PROJECT ROLES AND RESPONSIBILITIES |                            |  |
|------------------------------------|----------------------------|--|
| <b>Project Name</b>                | RateMyApartments           |  |
| <b>Name</b>                        | <b>Role</b>                | <b>Responsibilities</b>  |
| Faizah Kolapo                      | Developer & product design | This member would contribute to figuring out the design of the website while taking the audience into consideration as well as the limitations to the tools and features. This member would also be responsible for the developing code for the website's homepage and reviews page.   |
| Sara Roshan                        | Developer & product design | This member would contribute to figuring out the design of the website while taking the audience into consideration as well as the limitations to the tools and features. This member would also be responsible for the developing code for the website's apartments page (showing the apartments in Regina) and the reviews page. Sara would work with Faizah to put the reviews page together. |
| Julian Gonzales                    | Developer & product design | This member would contribute to figuring out the design of the website while taking the audience into consideration as well as the limitations to the tools and features. This member would also be responsible for the developing code for the user interactions on the homepage, apartments and reviews page. Julian would work with Faizah and Sara to put this together.                     |
